Bicycle Safety

Be predictable and act like a vehicle
Bicyclists on public roadways have the same rights and responsibilities as automobile drivers, and are subject to the same state laws and ordinances.

Always wear an approved helmet
Always have your helmet fitted and adjusted properly. Helmets should fit snugly so that they do not move around while riding.

Ride with traffic
Motorists are not looking for bicyclists riding on the wrong side of the road. State law requires that cyclists ride with the flow of traffic.

Use hand signals
Hand signals tell pedestrians and motorists what you intend to do. It is state law that you use signals.

Watch for cars pulling out
Always assume that motorists do not see you. Make eye contact to assess your safety before proceeding in front of a vehicle.

Wear appropriate clothing
Wear light, bright and/or reflective clothing at all times to improve your visibility. Dress in layers and bring gear for unforeseen changes in weather.

Use lights at night
State law requires a front white light visible for 500 ft and a red reflector visible for 600 ft at night. More reflectors and stronger lights make you more visible.

Be courteous and respectful on trails
Show courtesy to all trail users. Adhere to trail hours and restrictions. Respect the rights of property owners.

Always yield to other, slower trail users
Slow down and use caution when approaching other trail users. When overtaking, announce your intentions by saying “passing on your left” or ringing your bell.

Ride as far to the right as practical
Form a single file line when other users are present. Slower trail users should stay to the right.

Before You Use This Map

This map has been developed by the Eastern Upper Peninsula Regional Planning and Development Commission and its partners to assist individuals in finding appropriate bicycle routes. The user is expected to exercise the good sense of a reasonable person in conjunction with the use of this map. Personal safety remains the responsibility of the user. As the Eastern Upper Peninsula Regional Planning and Development Commission does not maintain the roads or paths reflected on this map, it makes no express or implied guarantee as to the safety or condition of them. Road and path conditions indicated on the map will change with time. The suitability of traffic, roads, and trails will vary depending on your comfort and skill as a cyclist.

All private entities and person involved in the creation of this map disclaim responsibility and shall not be answerable or held accountable in any manner for loss, damage, or injury that may be suffered as the result of the use of this map.

What to expect biking in the E.U.P.

The topography of the eastern U.P. can generally be described as level. There are a few areas where land is rolling and few areas of sharp relief. Much of the area is forested or wetlands. Typical state highways will have a 2 foot paved and 4 foot gravel shoulder. Major county roads will have a 4 foot gravel shoulder. Minor county roads may have a small grass shoulder. Numerous islands, inland lakes, rivers, geological formations, with an abundance of wildflowers, cattails, tree canopy’s and wildlife is sure to provide an interesting yet peaceful experience from your ride through the eastern U.P.

For more information on road surface types, conditions and traffic volumes go to the website www.eup-planning.org and follow links to Transportation - Asset Management and Traffic Counts. 2000 Population by Zip Code from www.census.gov.

Where to Bike

On the Road
Bicycles are permitted on Michigan highways and roads, the only EXCEPTIONS are limited access freeways or roads with posted prohibitions. Bicycles are allowed on road systems within State Forests, State Parks, National Forests, and National Parks. For more information on minor roads, county road commissions typically offer county road maps.

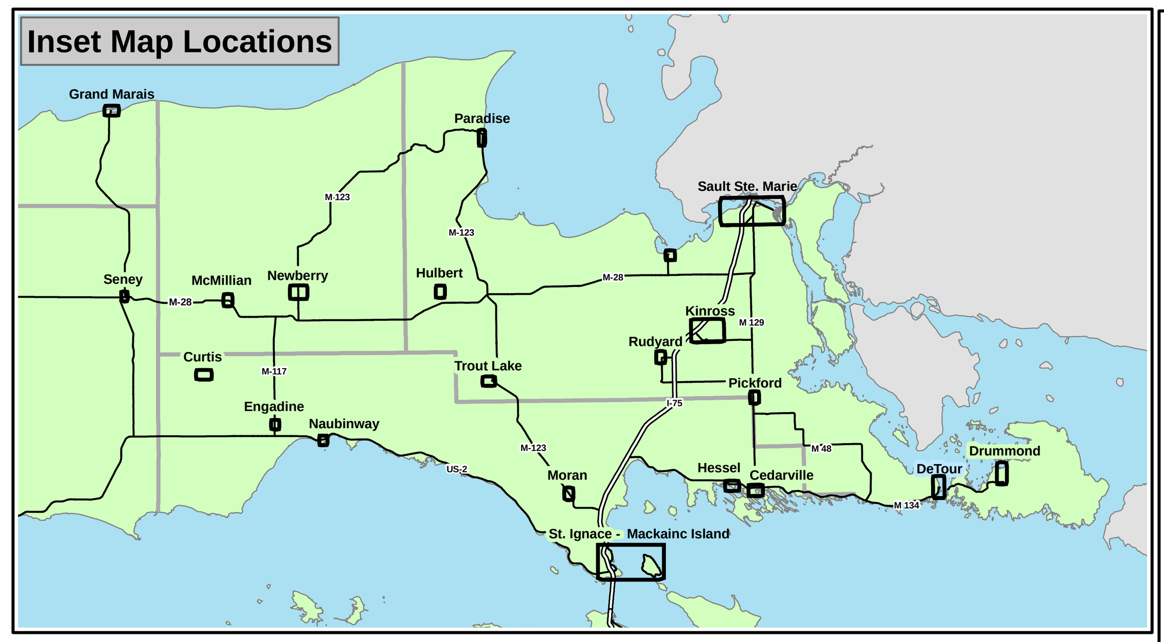
Trails in State Parks and Recreation Areas
There is no better bicycling country than Michigan's scenic and rolling two peninsulas located in the heart of the Great Lakes Basin. Plenty of trails and pathways challenge bicyclists of all ages, types and skill levels, as well as plenty of space to rest and camp.

Bikes are allowed on all paved and non-paved roads in state parks and recreation areas. Bikes may also be ridden on designated bike paths. All-terrain bicycles are suited for many of the state and national trails. For more information, call the individual park or the Michigan Department of Natural Resources Parks Division at (517) 373-9900 or visit their website at **www.mi.gov/dnr/**.

State Forests
Bicycles are allowed on most State Forest trails. Contact the Michigan Department of Natural Resources Forest Management Division at (517) 373-1275 or visit their website at **www.mi.gov/dnr/**.

Hiawatha National Forest
Beside wilderness and specifically designated hiker only trails (including the North Country Trail), the entire forest is open to mountain bikes. Contact the U.S. Forest Service at (906) 786-4062 for more information or visit their website at **www.fs.fed.us**.

North Country National Scenic Trail
When completed, the North Country Trail will be a 4,000 mile National Scenic Trail stretching from New York to North Dakota. The North Country Trail is foot traffic only thru the Hiawatha National Forest, other sections may also be closed to bicycles. For more information visit NCTA web site at **www.northcountrytrail.org.**



LEGEND

Places
- FULL SERVICE PLACES
- Some Service Places
- No Service Places

Roads (Wide Shoulder)
- Paved - Light AADT
- Paved - Medium AADT
